HEMEROCALLIS LIST - 1952KENWOOD IRIS GARDENS

(Mrs. J. F. Emigholz)

Phone SY. 7496

7595 Montgomery Road

Cincinnati, 36, Ohio

An increasing interest in daylilies was noticeable last year. We desire to express our appreciation of the many favorable letters received on the quality of plants furnished. Also the highly complimentary expressions on the varieties introduced. It shall be our endeavor to further merit your good will in every respect. More and more gardens are planting daylilies, as they bloom from late May until early fall, by selecting suitable varieties. The time of bloom given is for our locality. They bloom later in the North and East. Several kinds often bloom again in fall, and are marked "X" before the price.

The plants bloom the best in a sunny location, but will take shade for half a day. Keep them moist just before and during the blooming season to produce larger and finer blooms. But they do well even in dry climates, which accounts for their popularity in the Mid-West. Allow 2 feet between plants for normal growth. When planting, place the crown a little below the surface, and spread out the roots. Any good fertilizer will help growth and bloom. We have found that compost induces a good root growth.

FRAGRANCE: All evening bloomers and the lighter yellows (0-5) are fragrant. Also nearly all in the yellow and orange shades. Pink and red varieties do not seem to have it, or only in a limited amount.

COLOR LISTING: Varieties are placed in color groups. Few people have color charts, and do not know the depth of color from the descriptions. Yellows come in several shades, some greenish as barium or citron yellow, others lemon in color. Then there are pure yellows, as amber, empire and chrome, and some have a touch of gold or orange in their make-up. As the Betscher hybrids are well known, and have a wide color range in the yellow and orange shades, they were used as a basis for depth of color, and begin with "1". Flowers lighter in color are marked "0" or "00" for a paler shade. Other varieties having the same color number may be entirely different in form, size of flower, and height, but are in the same color tone. The numbers are used only to help you select different shades in color. Since this procedure may be difficult to use with pink or red shades, and some color patterns, we are using another plan. These varieties will be marked L. M. or D. before the name, indicating whether they are light, medium or dark in general coloring. Advise if this method is helpful to you.

TRANSPORTATION: Strong, single divisions are sent postpaid. Not small plants that will not bloom. If heavier plants of the less expensive varieties are wanted, have them sent express collect, or enclose extra postage. Larger plants make a better showing. Local orders can be dug any time, if the weather allows, but those for shipping are sent only in early spring until mid-May, and after the blooming season until mid-Oct. Those listed for fall delivery are sent after the middle of August. No orders are accepted under \$2.00. Ohio purchasers, please add sales tax.

SEEDLINGS: Each year new varieties are developed, showing improvements in form and color. Of these, only a few are set aside for further testing. Do you want a thrill? Then try some, all will bloom this year. You will receive colors that are not possible in named varieties offered at the same price. Only sent after the blooming season.

FINE MIXTURE: Includes all colors in a balanced mixture, 8 for \$2.50 postpaid; 20 for \$5.00; 50 for \$10.00, express collect.

ARISTOCRAT SERIES: An extra fine selection, labeled as to color. 6 diff. for \$3.00; 12 diff. for \$5.50 postpaid.

Pink or Red Seedlings: Labeled as to color. \$.90 each, 3 for \$2.40 postpaid.

INTRODUCTIONS

These seedlings have been carefully selected as being distinct and better than known named varieties. We have tried to keep prices at a level most people can pay. Good plants sent. Two descriptions are given for these varieties. The colors are taken from Ridgeway's chart for the first description, and are intended for those who want exact colors. The second one gives the general color most people would see in the flower. All pale yellows introduced are distinct in form and growth.

Ten varieties were sent to the Valleevue Test Gardens at Cleveland in the fall of 1949. In their report received the following year, 6 were commended in the following groups: AA Superior - Riviera and Samson. A Excellent - Flaming Glory. B Good - Armada, Cool Waters and Mezzotint. Others may receive favorable mention, when the plants are better established. Varieties are semi-deciduous in growth here.

1952 - Several varieties are especially suited for the front border.

- M ANNA GARRY - 38" July-Aug. Flower $5\frac{1}{2}" \times 1\frac{1}{4}"$. A light Apricot Gold, with a long V handing of dark terra-cotta rose. A lovely, recurving flower with fluted petals. Green center, with a yellow star at the throat. Fall delivery. \$5.00
- 3 DELPHINE - 32" July. Flower $6\frac{1}{2}" \times 1\frac{1}{2}"$. Very free bloomer of light Empire yellow, green throat. Broad, overlapping, slightly recurving petals, lightly twisted at the ends. Good form and substance. Unfading. Fine garden plant. \$3.00
- O ELLEN - 24" July. Flower $6" \times \frac{3}{4}"$. Pale lemon yellow, widely recurving segments almost equal in size, petals slightly twisted at the ends. Unfading all day. A favorite with the women. \$3.00
- OO PALE HANDS - 36" July-Aug. Flower $6" \times 1\frac{1}{2}"$. Barium yellow, flushed citron yellow. Crinkled petals, sepals often twisted and recurving. Apricot yellow throat, green center. Unfading and open all day. A light yellow of distinctive form. \$3.00
- M RUBEO - 38" Late July-Aug. Flower $5\frac{1}{2}" \times 1\frac{1}{4}"$. Velvety dark Nopal red, with a faint lighter mid-rib. Large green star-shaped throat. A late flowering, bright strawberry red. Segments overlap at the base, widely spreading, and recurve slightly. A good color. \$4.00
- M TINY TIM - 15" July. Flower $3\frac{1}{2}" \times \frac{3}{4}"$. Broadly top-branching, with many buds. A medium red, veined darker, small gold midrib and wire edge on all segments, that are nearly equal in size. Yellow star-shaped center, green throat. A very free bloomer. \$3.00
- M VELVET FIRE - 44" Mid July-Aug. Flower $5" \times 1\frac{1}{2}"$. Velvety Nopal Red, a shade deeper than scarlet, petals veined darker. Sepals have a golden undertone. Green center, with a lemon star at the throat. Smooth, unfading color. \$4.00

1951 - The variety Titian is withdrawn to increase stock.

- L EVADNE - 48" July-Aug. Flower $6" \times 1\frac{1}{2}"$. Amber yellow, flushed deeper, sides of petals brushed with faint pinkish cinamon. Sepals darker, green throat. \$2.50
- L FAIRY MAID - 36" July-Aug. Flower $6" \times 1\frac{3}{8}"$. Ochraceous buff petals, veined and overcast light carrot red, darker at center, green throat with lemon star. Sepals flushed a deeper rose shade. Petals fluted lightly. A nice salmon flesh color. \$3.50
- M GARGOYLE - 40" July. Flower $5\frac{1}{2}" \times 1\frac{1}{2}"$. A pleasing color of light brownish tan, pale edge, with a faint buff-yellow mid-rib, and a dark band at the center. Lemon chrome throat. Petals twist widely at the edges. \$2.50
- O KENWOOD - 46" Late July-Aug. Flower $6\frac{1}{2}" \times 1\frac{1}{2}"$. A lovely large pale lemon, greenish throat, overlapping at the base, with recurving petals. Flowers are borne on short stems and look like a large lily. The loveliest of the pale yellows introduced. Increases slowly. \$6.00

The following varieties have been introduced from 1943-1950.

- L ADMIRABLE (50)-36" July. Ochraceous buff petals, closely veined and flushed light Pompeian red, broad band of same color at center. Lemon throat, greenish center. Sepals paler, with a crinkled whitish edge. A broad, slightly reflexing flower, that has a decided pink coloring. \$5.00
- 2 APOLLO (46)-45" July-Aug. Lemon chrome, a tone more golden than Hyperion. Has the form of Mrs. Wyman, but is twice as large. Stems branch well. Fragrant. \$1.25
